13" Economy

Reg: \$1169

Holds: 108ml of ink.

13" HS + More Ink

Reg: \$1349

Holds: 144ml of ink.

17" - Roll - Most Ink

Reg: \$3095

Holds: 880ml of ink!

With the amazing success of the 1400 Blackmax System, we're expanding the BLACKMAX line to include the NEW R1900 and 4880 printers. BLACKMAX systems print faster and hold more ink than any other inkjet film output system on the market today. Instead of just one or two cartridges of ink, WE USE THE ENTIRE PRINTER. The AccuRip Software allows the printer to utilize all the ink and print beautiful high quality halftones at the same time!

All BLACKMAX Systems include a total of set of specially formulated dye black ink cartridges (for blackMAX opacity), 200 sheets of film (or 17" Roll for the 4880), the AccuRip software that rivals none, plus extra training DVD's! , This system includes everything you need to print opaque films and halftones in house! FAST, EASY, ECONOMICAL!

Get a step up on your competition and become a BLACKMAX user today!

AccuRIP™ is a PostScript interpreter called a Raster Image Processor or RIP. Without PostScript it is impossible to print high-quality halftone dots on a "non-PostScript" inkjet printer such as an Epson. Even if your printer has Post-Script, it may not be able to print halftone dots because PostScript is often just used to calibrate and balance colors on an inkjet. The Epson "RIP" does not print halftone dots, but AccuRIP™ does! AccuRIP™ works with the following Epson Printers: 800, 1280, 1400, 1520, 1800, 2200, 3000, 4000, 4800, and 4880. This means that in the future when you may need a new printer or larger format you DON'T have to buy new software!

R-Film™ Waterproof - Tried, Tested, and True R-Film is the ultimate in waterproof positive technology. We've tested this film extensively ourselves along with several large screen printers throughout the country. The results have been outstanding. This 4 mil thick specially formulated film is ideal for optimum density, drying time, halftone shape, image clarity, and longevity. R-Film works with both pigment and dye based inks. Available ONLY from Ryonet. Using an Epson printer for film output requires Waterproof films.
